Siskin

Starling

## features & benefits

### Superior Product Design

- Each rail has three points of contact with its pickets. This unique design creates a strong bond that eliminates sagging, twisting, and cupping.
- Rails have no run lines or seams to accumulate water or debris, so fences resist mold and mildew.

### Long-Lasting Durability

- Components are powder coated after punching and notching, resealing all exposed surfaces with a new protective powder coat finish.
- Crimped rail style channels water away from fence.

### Strength & Safety

- All rails and pickets are measure before powder coating, making OnGuard one of the thickest in the industry.
- Pickets are designed with rounded points, making them safe for children and pets.

### Classic Style

- Our products have the classic look of wrought iron, but with the maintenance-free durability of aluminum.
- Corrosion-proof stainless steel screws, custom designed with smaller heads.

### Lifetime Warranty
